A G E N D A

1. Introduction of Attendees and any New Participants
2. **Keith Sketchley, P.Eng., Engineer and Manager**

Keith with many years experience in the aviation industry working as an Avionics Systems engineer and more generally as a design engineer has broad experience using, repairing and modifying products, evaluating economics and developing new systems. His current interests include aviation and automotive electronic systems and external medical devices. Keith's talk will focus on:

**“Product development perspectives – usability
and economics”**

Keith will use, as an example, a kitchen aid for weak hands to show factors that can impede or facilitate market success. He will also describe other cases including aviation, communications and software to illustrate principles applicable to developing effective products and services.

In addition to methods of product development for usability, he will address the financial impact of doing the right job well covering some enterprise tasks related to both product and general business administration.

3. VIATeC Meetings of Interest within the next month.
4. Any Other Business.
